

Helmand Valley Development

The following three sections are in fact parts of a report written by Ghulam Farouq (Farouq Azam) some time after 1977.

Unfortunately parts of the total report are missing. But the parts included are full of historic detail not easily available in other places. Farouq, originally from Kandahar, worked with HAVA for many years including active participation in at least two of the Helmand Farm Economic Surveys, 1970 and 1975. He is one of the most knowledgeable living people on the Helmand Valley and its development.
